Re: Soterion, Inc.

Dear Mr. Wengrow:

Thank you for yours of February 25, 1982. I apologize for the delay in responding. However, the last two weeks have been a catastrophe!!

The basic problem I have is still concluding in my mind that the grinding sludge from Triumph Twist is "industrial process waste" while it still has value for "recycling". Not having a copy of the Act or the Amendment, which I'm sure contains the definitions, it is difficult to come to any legitimate conclusions.

However, I'm going to suggest to Mr. Semans that he proceed to prepare the permit application. It is my understanding, at this juncture, that no special equipment or control devices are required. If Mr. Semans has any difficulty in preparing the application, I note by your letter he is to contact Mr. Eugene Theios.

Certainly, if compliance is required, I am going to recommend that to my client. However, I must admit at this juncture, I am shooting in the dark. If it is feasible to have your office staff prepare copies of the pertinent portions of the Act for my review, I would sure appreciate it.
